

Transportation

The transportation department of Klingner & Associates, P.C. provides professional planning, engineering design, and environmental services for the transportation industry. The firm is continually expanding its capabilities and expertise to serve the ever increasing transportation needs of clients. We have undertaken a broad

ACEC-Illinois Engineering Excellence Merit Award Winner

range of assignments including design/location studies, environmental assessments, master planning, design of roadways, bridges and freeways, as well as rehabilitation and improvements to existing transportation infrastructure.

Our projects include design of state and county highways and bridges, township roads, city streets, roads for parks and subdivisions, industrial parks, airport facilities, and barge docking facilities along the Illinois and Mississippi River. Projects are enhanced by the capacity to design supporting components such as storm water handling facilities, traffic signals, parking areas, and lighting for streets and airports.

Clients who choose our firm to design their transportation projects benefit from:

- Cost effective design by our highly qualified and experienced staff.
- Technical excellence due to the use of state of the art surveying and CADD systems.
- Quality construction enhanced by our experienced construction technicians.
