

Water Services

Klingner & Associates, P.C. has successfully met the demands of clients by planning and designing water supply, treatment, storage and distribution facilities for communities, industries and rural water districts since the 1940s. Water systems are designed for each client's special needs.

Klingner & Associates, P.C. provides complete project services:

- preliminary reports
- funding assistance
- system designs
- preparation of contract documents
- bid analysis
- resident construction engineering
- startup and operation assistance

Clients who choose our firm to design their rural water projects benefit from:

- Overall cost savings resulting from our past experience with similar projects.
- A timely response to our client's needs.
- A successful design within cost and time constraints.

Wastewater Services

Klingner and Associates, P.C. is committed to developing sound solutions for the collection, treatment and disposal of wastewater, including sanitary sewage, industrial wastes and storm water.

For more than 50 years, the firm has designed wastewater systems for municipalities, utilities and industries. The firm takes great pride in matching treatment systems not only to effluent quality goals, but also to our client's resources. The result is a low cost, easy-to-maintain system.

The firm is a leader in the design and implementation of "zero discharge" systems by recycling municipal wastewater for irrigation of recreation and agricultural lands. These innovative facilities provide effective and economic operations.

Clients who choose our firm to design their Wastewater projects benefit from:

- Lower capital improvement project cost resulting from thorough design documentation and use of "standard" items.
- Limited administrative responsibilities because of our firm's comprehensive contract administration.
- Minimal disruption of existing operations and utilities because of our preconstruction planning and use of innovative construction techniques.
